Cooperation: Colorless and transparent Performing Arts Production Office

This theater company was founded from the desire to revitalize the theater world in Hiroshima. I believe that theater can be used as a more familiar form of entertainment, and I am active every day. With the stance of "leaving the theater to get people to come to the theater", in addition to theater performances, we are active in a wide range of activities such as appearing in video works, TV commercials, narration, and writing.

Calligraphy performance

Hiroshima Bunkyo University Calligraphy club

We are engaged in calligraphy and calligraphy performances, and in our works we have done classical writing, which has been exhibited in university exhibitions and competitions. In calligraphy performances, we make use of the skills we have acquired in classical writing, think about original compositions, and express them in various calligraphy styles. Before Covid-19, we performed on the stage of the university festival "Bunkyo Festival" and "Bunkyo Culture Exhibition", welfare facilities, attached kindergartens, etc.

In this performance, the theme of "Colorful" will be expressed energetically on a huge piece of paper. All members of the club will work together to deliver the best performance and the art culture of calligraphy!
